Overview

World-class organizations must focus on improving their ability to service markets in the face of increasing customer demands by creating value, as well as developing and sustaining a continuous improvement culture.

Lean experts must be the strategic drivers for the identification of waste and the leaders to define strategic opportunities. Six Sigma will be integrated to advance operational excellence through analytical and data driven analysis to continuously improve and control process innovation.

Students participating in the Lean Six Sigma Black Belt Program will learn:

- To fully understand the history and the contributing developers of lean and six sigma.
- To fully understand the strategic objective of lean and six sigma.
- To mentor and lead the organization in lean and six sigma.
- To become an expert in lean and six sigma tools and advanced methods.
- To become conversant at the development of a strategic Operational Excellence plan and lead the execution of Lean Six Sigma Projects.

Students will complete a Lean Six Sigma Black Belt project to receive certification.
